

Nervora

Nerve + Aurora

Your Body, Your Interface

Through the neural interface device on the bridge of the nose, users can adjust the sensory sensitivity at any time. The accompanying APP displays real-time sensory usage statistics and supports personalized control of the five major channels: vision, hearing, touch, smell and taste.

Pick Yours

Nervora Base

single sense control

£1,790.00

Each base module contains only one neural node and can only regulate one perceptual dimension. If you want to be truly 'free', you have to buy more.

Nervora Core

multiple sense control

£6080.00

Five senses linkage, precise and synchronized regulation. By combining the neural nodes, it realizes the unified perception management under complex scenes.

The senses no longer belong to you, but to the part of you that can afford them.

Louis Vuitton x **Nervora**

Metallic plating, leather wrapping, branded customized neurochips-- It's not just a device, it's a class statement. the Nervora co-branded collection creates an exclusive sensory experience for the 'high-end crowd' who don't want to put up with the pollution of ordinary information. Your world is clean, serene and scented.

Sober is a luxury
